

# Lecture 01: Class Introduction and Overview

## BME464L (Fall 2013, Palmeri)

- Introductions
- Knee injury update: <http://sites.duke.edu/patellarpieces>
- Roster review
  - All students:
    - What did you do this summer?
    - What are you doing after you graduate?
    - What do you hope to get out of this class?
  - New students:
    - Fun fact to remember you by
- Syllabus review: <http://mlp6.github.com/Medical-Instrument-Design>
- List of projects
- Student "To Do" List:
  1. Form groups of 4 students
  2. As a group, rank your top 5 projects by name.
  3. Email Dr. Palmeri with your group members and project rank list by Wednesday at 5:00 PM. If your group has a strong reason why you would like to work on a specific project, then please include a short description of those reasons.
  4. Start reviewing your training materials for the student machine shop
  5. Sign up for a [GitHub](#) account
  6. Start reviewing the [Getting Started](#) material on <http://git-scm.com/>.
